Industrial Acoustic Booth made of stainless-steel AISI304 or AISI316, specially designed for heavy industrial plants
P/N AM-BTA5/A

Main Characteristics

- Generous size, suitable for industrial telephones
- Good level of noise reduction (up to 25dB)
- Made of INOX AISI304 (or AISI316 on demand) normally not painted (epoxy painted on request only)
- Easy wall fixing system, by two holes on the back and a security holding point on the front down
- Simple, Robust and Reliable
- Suitable to be used with any industrial telephone with max weight 20 kg

Manufacturing material:..... AISI 304 stainless-steel plates
 Inside plates:high-density drilled plates
 Noise protection:..... non hygroscope rockwool 100 kg/m³
 Color:..... not painted (painted on request)
 Reinforced plate:for all of our industrial telephones
 (for other telephones on request)
 Internal Lamp:..... available on request (optional)
 Writing desk base:..... available on demand (option)
 Dimensions (mm):..... 680 (h.) x 700 x 600
 Weight:30 kg
 Fixing:..... on the wall

Installation procedure:

- The AM-BTA5/A is suitable for industrial noisy environments
- To obtain the best performance, do not install the box with its front part directly exposed to the noisy equipment (the best is to install the box on a column in such a way that its back part is exposed to the noisy equipment)
- Avoid installing the open front part of the box in front of noise-reflecting surfaces (like windows)
- It is suggested to fix the box at the wall before installing the telephone, so that you will better analyze how to fix cables/tubes etc.

This equipment is covered by guarantee against materials/manufacturing defects for a period of 12 months
